

**ELIZABETH HILL**  
ASSOCIATE URBAN DESIGNER

*Professional Experience*

---

*Design, Community & Environment, Berkeley, California. Associate Urban Designer.* 2008 through present. Responsible for project management, design, research, report writing and graphic production for urban design, neighborhood planning, streetscape design, and downtown revitalization projects.

*KenKay Associates, San Francisco, California. Landscape Designer/Project Manager.* 2004 through 2008. Designed planning and landscape improvements for large-scale industrial brownfield sites and retail developments. Managed construction document coordination with clients, subconsultants, staff, and governing agencies. Supervised construction of streetscapes and commercial landscape installations. Facilitated and provided graphic presentations for community workshops. Developed small-scale sustainable garden prototypes for neighborhood residential communities.

*The Guzzardo Partnership, San Francisco, California. Landscape Designer.* 2001 through 2004. Responsible for producing all phases of work from preliminary design ideas through construction documents. Master-planned communities in California, Idaho, and Nevada. Generated landscape designs for streetscapes, commercial developments, multifamily housing, and urban infill projects. Developed and rendered presentation sketches for public meetings. Worked closely with client developers, consultants, and government agencies. Established site specific design elements and created corroborative construction details. Made site visits for administration of landscape construction. Created standards for landscape maintenance specifications.

*Ralph J. Alexander & Associates, Novato, California. Landscape Designer/Project Manager.* 2000 through 2001. Developed design concept plans and construction documents for private and municipal projects, including streetscapes, wetlands restoration, and mixed-use developments. Provided cost projections and budgeting for projects. Created standards for AutoCad documents and provided staff tutorials. Conducted site evaluations, surveying and grading investigations.
